INDUSTRIAL SCHOOLS FOR DELINQUENTS.

SCHOOLS REPORTING.

The schools reported as "Industrial Schools for Delinquents" are all reformatory institutions for delinquents and receive inmates committed by juvenile or other courts. Reports were received from 145 institutions: 30 of these are private institutions controlled by corporations or associations, and they admit children committed on public charges and therefore receive appropriations from the State. In 1900 the number of schools reporting was 80. According to the records of this bureau, there are 176 public industrial schools for delinquents in the United States. The per cent reporting in 1922 is about 82 per cent of the total.

INMATES.

The average number of inmates per school has increased from a little less than 300 in 1900 to more than 450 in 1922. The ratio of the whole number of inmates in the United States in 1900 to the total number of children 5 to 18 years, inclusive, is 1.1. The number of students receiving instruction per teacher has remained about constant since 1900, being slightly in excess of 40. During the year 1921-22, children committed to reformatory institutions numbered 31,240, and 31,250 were discharged. The average number of inmates for the year is 38,867, of whom 58 per cent enrolled in school classes. During the past 22 years colored inmates in these schools have increased more rapidly than white inmates. Females have increased more rapidly than males.

ILLITERACY.

Eighty-nine schools, representing about two-thirds of the total commitments, report that 9 per cent of those committed during the year could neither read nor write. Forty-four schools, representing about one-third of the commitments, report 20 per cent able to read in the second reader but not able to write. If these rates are constant for all schools of this type, it would indicate that about 71 per cent of the inmates committed during the year could both read and write. One hundred and twenty-seven schools report 93 per cent of those discharged able to read and write. This would indicate an effort upon the part of these industrial schools for delinquents to teach reading and writing to those assigned to their care. It would indicate, also, that illiteracy is not entirely eliminated in these schools.

The children who have had all the benefits of these industrial schools for delinquents have still a much greater per cent of illiteracy than has the general population. It is to be remembered, of course, that ability to read and write is not always tested by the same standards.

RECEIPTS AND EXPENDITURES.

In 1918 total receipts of \$13,031,130 were reported by 130 schools; in 1922 total receipts of \$17,684,277 were reported by 126 schools. In 1918 total expenditures of \$12,401,067 were reported by 132 schools; in 1922 total expenditures of \$16,992,197 by 134 schools. This represents an increase in cost per pupil of about 40 per cent.

TABLE 1.—Summary of statistics of industrial schools for delinquents from 1900 to 1923.
